Plagued By Data and Security Issues?

Internet Security

Security Network Appliances are used to protect PCs and Servers from malware and intrusion. There are over a million Viruses, Malicious code, Worms, Trojans and Key-Stroke Loggers. Internet security companies are discovering some 3000 every day. All are generally geared to either break into, steal and/or sell our important information, damage our computers and cause general havoc and stress.

Network appliances provide a complete solution consisting of limited hardware and software that is needed to perform a specialized set of functions. Let us give you a free quote and comparison.

Backup/Disaster Recovery

How long can your business be down without access to your data? Of course, the ability to recover quickly with minimal negative impact on your operation is a goal that many have. It's easy to say that every business needs to have a disaster recovery plan in case of a catastrophe but it's another thing to actually implement it and have it function. Disaster recovery is the process of getting your business back in operation after a catastrophe has occurred. The options are many and mostly affordable compared with what you could lose. We have many solutions to choose from thus let us give you a free quote to meet your needs and budget.

NEW CHALLENGES in Medical Offices

- HIPAA 5010 CHANGES • ICD-10 CHANGES
- AARA Investment Act

American Recovery and Reinvestment Act

For qualifying Providers, receive as much as \$65,000 when you use Electronic Medical Records. Don't get left out. Let us evaluate your qualifications to become an Eligible Providers (EP) demonstrating "meaningful use" of Electronic Medical Records.

Changes in HIPAA 5010

Our software provides you with the needed programs for your office to be compliant. With the new data changes and modifications of HIPAA 5010.

The New ICD-10

ARE YOU READY FOR ICD-10 CHANGES? IS YOUR SOFTWARE READY? The number of codes will increase considerably from about 14000 codes to about 70,000 codes. This change is a critical change in how the medical community works with diagnosis.

Why Medical Offices Fail

There are numerous reasons why medical offices fail. Don't let your office be effected. Let us help you manage your patient accounts and receivables so your office stays current with the fast changing Medical field.

Impresario Medical Software Solutions Overview

- 1. Electronic Medical Records (EMR) Software** will enable a practice to document and maintain all of their patients' medical records in an electronic file. This makes these files easier to access when needed.
- 2. Automated Patient Check In (APCI) Software** enables patients to check themselves into a facility through a touch screen provided to them in the lobby. An electronic waiting registry is created for office staff.
- 3. Practice Management and Billing (PMB) Software** will help your practice effectively manage patient account information as well as provide needed Patient and Insurance Billing Features to help you get paid for all your services.
- 4. Electronic Document Management (EDM) Software** will enable a practice to manage documents electronically and efficiently. This product eliminates need for costly cabinets and space required by paper documents.
- 5. Electronic Time Clock (TC) Software** makes employee time keeping tasks easy. No more timecards or old punch clock machine
